

Replicate of Figure 4 Sherman-Baust et al 2014. PCA plot of Mutant (mogp-TAg) vs WT FT Tissue
Expression data was filtered (JMP) by P-value<0.05, the false discovery rate adjusted p-value <0.3 (JMP), z-ratio >1.5 and mean z-score for each sample is 0 (Excel). Principle Component Analysis (PCA) was done using JMP and plotting the values in JMP 3D Scatterplot.
